EXPERIENCE:

MRG Engineering Company — MERN Stack Developer (August 2025 – September 2026)

Built and deployed full-stack web applications using the MERN stack and AWS. Handled both frontend and backend development over a one-year period, creating responsive user dashboards, secure logins, and REST APIs. Managed all phases of the project including database setup, testing, live cloud deployment, and ongoing maintenance for real-time business tools.

SSS Smart Tech – React.js Developer Intern (May 2025 – Jul 2026)

Developed frontend web applications using React.js for two major projects: a Service Request Management tool and a Recruitment & Opportunity Tracking System. Built responsive user interfaces and implemented real-time features for seamless user experiences.

SKILLS:

Frontend : React.js, JavaScript (ES6+), HTML5, CSS3

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Python (Intermediate)

Deployment & Cloud : AWS EC2, Vercel, Render, Hostinger

Databases & Tools : MongoDB, SQL, Git, GitHub

PROJECTS:

StaffIn– Multi-Tenant HRMS Web Application (SaaS Platform)(Github) | Live: staffin.online

Tech Stack: [React.js, Node.js, MongoDB, Hostinger]

- Developed a scalable multi-tenant HRMS SaaS platform that enables multiple organizations to independently manage employees, attendance, payroll, tasks, leave requests, notifications, and workforce activities through dedicated admin and staff dashboards.
- Engineered responsive dashboards, RESTful APIs, authentication, and real-time workforce tracking to streamline daily HR operations and provide centralized visibility into employee attendance, work progress, task management, and organizational activities.
- Deployed and hosted the production application on a Hostinger server and continuously maintain, monitor, and update the platform to ensure reliable performance, feature improvements, and smooth day-to-day operation.

E-Commerce Bookstore – E-Commerce Platform (GitHub) | Live: iftchennai.in

Tech Stack: [React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, AWS]

- Developed a full-stack e-commerce platform from scratch that enables users to browse and purchase physical books, e-books, and audiobooks, with product browsing, cart, checkout, and order management functionality.
- Built and integrated the complete frontend and backend, creating responsive pages, reusable React.js components, interactive animations, RESTful APIs, JWT authentication, MongoDB integration, and Razorpay payment gateway for online transactions.
- Deployed the application on AWS and manage the production platform effectively by maintaining functionality, resolving issues, improving features, and enhancing the overall user experience.

EDUCATION:

Master of Computer Applications (MCA)

Bishop Heber College, Trichy | CGPA: **70.08%**

June 2023 – April 2025

Bachelor of Science in Physics (B.Sc.)

St. Joseph's College, Trichy | CGPA: **75.01%**

June 2020 – April 2023

CERTIFICATION:

- Web development using HTML & CSS, JavaScript, T4TEQ
- Core Java, Billianz Academy
- Python Foundation, Infosys Springboard
