

IFT Chennai

E-Commerce Bookstore Platform

Developed by:

Harish R

Full Stack Developer

Live Demo: <https://iftchennai.in/>

GitHub Repository: <https://github.com/harishramamoorth/E-commerce-Bookstore.git>

Project Duration:

Feb 2026 – July 2026

Tech Stack:

React.js | Node.js | Express.js | MongoDB | JWT | AWS S3

Book Detail – Empowering Informed Decisions

The Book Detail page is where customers move from browsing to buying. It provides comprehensive information that answers every question a customer might have before adding an item to their cart.

How It's Used Effectively:

- **Author Credibility:** By prominently displaying the author's name (Moulana Syed Abul A'la Moududi – a renowned scholar), the page instantly establishes the book's authority and authenticity. This builds trust and eliminates hesitation.
- **Comprehensive Description:** The detailed Tamil description explains exactly what the book covers – the final 30 chapters (78-114) of the Holy Quran with background and historical context. This removes uncertainty and helps customers understand the value they're getting.
- **Clear Navigation:** The "Read More" link invites deeper exploration without overwhelming the main view. This gradual reveal keeps the page clean while allowing interested customers to dive deeper.
- **Consistent Branding:** The top navigation (Home, Books, Digital Products, E-Quran, Membership, More, My Account) remains consistent, making it easy for customers to continue browsing after their purchase.

Why This Page Matters:

Clear, detailed product information reduces cart abandonment by removing uncertainty. When customers trust what they're buying, they complete their purchase confidently. The combination of author credentials and comprehensive descriptions creates a powerful trust signal that converts browsers into buyers.

Homepage – Quick Discovery & Instant Action

The Homepage serves as the platform's central hub, designed to help customers find products quickly and add them to their cart with minimal friction.

How It's Used Effectively:

- **Search-First Design:** The prominent search bar ("Search by title or author...") enables customers to find exactly what they want in seconds – ideal for returning visitors who know what they're looking for.
- **Category-Based Navigation:** Clear sections (Books, Digital Products, E-Quran, Membership, More, My Account) organize content logically, making browsing intuitive for new visitors.
- **Visual Product Cards:** Each product displays title, price, and an "Add to Cart" button. This minimal design reduces clutter and focuses attention on the purchase action.
- **Immediate Purchase Path:** The "Add to Cart" button is always visible on each product card, eliminating extra clicks and reducing purchase friction.
- **Stock Visibility:** Clear pricing and availability information helps customers make quick decisions without clicking into each product.

Why This Page Matters:

This homepage reduces the time from arrival to purchase. By providing both search and browse options, it caters to different customer behaviors – those who know exactly what they want (search) and those who want to explore (categories). The prominent "Add to Cart" button removes friction, making it easy for customers to act on impulse.

Books Category – Organized Discovery & Efficient Browsing

Screenshot Placeholder:

About This Page:

The Books Category page transforms IFT Chennai's extensive catalog of 578+ books across Tamil, English, Arabic, and Urdu into an organized, shoppable experience. Instead of overwhelming customers with an endless list, this page empowers them to find exactly what they're looking for in seconds.

How It's Used Effectively:

- **Language-Based Filtering:** Customers can instantly narrow down the catalog by selecting Tamil, English, Arabic, or Urdu books. This serves a diverse audience – Tamil speakers can find content in their preferred language without scrolling past irrelevant titles, while Arabic and English readers can do the same. This reduces browsing time and makes the platform accessible to all.
- **Sub-Category Organization:** Additional filters help customers explore specific topics, genres, or series. This structured approach encourages discovery – users browsing one category may find unexpected titles that spark their interest, leading to higher average order value.

- Real-Time Inventory Transparency: The page displays "Showing 33 of 33 Publications" – customers know exactly how many titles are available in their selected category. This builds confidence and sets clear expectations, eliminating frustration from empty search results or unavailable stock.
- Instant Stock Visibility: "IN STOCK" badges appear prominently on each product card. This eliminates purchase hesitation – customers don't need to click into a product page just to check availability. They know immediately that the item is ready to ship.
- One-Click Purchase Path: Each product card displays the title, language tag, price, and an "Add to Cart" button. This reduces purchase friction – customers can add items to their cart without navigating away, keeping the browsing flow uninterrupted.
- Clean Visual Hierarchy: Consistent card design with clear pricing and ratings makes scanning effortless. Customers can compare options quickly and make decisions faster.

Digital Products – Audio Books & Streaming Integration

Screenshot Placeholder:

About This Page:

The Digital Products page is IFT Chennai's gateway to the growing digital content market. By offering audio books, digital Quran recitations, and integrating with popular streaming platforms, this page expands IFT's reach beyond physical books and into the digital-first world where modern consumers spend their time.

How It's Used Effectively:

- **Streaming Platform Integration:** The page prominently promotes that audio Quran is also available on Spotify and Amazon Music. This extends IFT's reach to millions of users who may never visit the website but are active on these platforms. It positions IFT as a modern, tech-savvy publisher that meets customers where they already are.
- **Free Access Strategy:** Some digital products are offered at ₹0.00 – a strategic loss leader. This lowers the barrier to entry, attracting new users who can experience IFT's content for free. Once engaged, these users are more likely to purchase physical books or memberships.
- **Language-Specific Filtering:** Customers can filter audio books by language – Tamil Audio (23), English Audio (0), Arabic Audio (0), Urdu Audio (0). This

ensures Tamil-speaking users can instantly find content in their preferred language without scrolling through irrelevant titles.

- Search & Sort Functionality: "Search audio books by title or author..." enables quick discovery for users who know exactly what they want. Sort options (Default, etc.) help users organize results based on their preference.
- Clear Product Information: Each audio book displays:
 - Title in Tamil for immediate recognition.
 - Language Tag (Tamil Audio Books) for quick filtering context.
 - Price – clearly visible to help customers make purchase decisions.
 - Stock Status – "IN STOCK" badges provide availability confidence.
 - Contact Information – IFT's website and phone number visible for customer support.
- Discounted Pricing: Some items show visible price reductions, creating urgency and encouraging immediate purchases.

E-Quran – Digital Quran with Tamil Translation & Audio

Screenshot Placeholder:

About This Page:

The E-Quran page is IFT Chennai's digital gateway to the Holy Quran, providing free access to authentic Tamil translation and audio recitation. This page transforms the Quran from a physical book into an accessible digital experience, enabling Tamil-speaking Muslims worldwide to read, listen, and understand the Quran in their native language – anytime, anywhere.

How It's Used Effectively:

- **Free Access to Quranic Content:** The page provides the complete Quran with Tamil translation at zero cost. This generous offering builds immense goodwill and trust, positioning IFT as a service-oriented institution that prioritizes community benefit over profit.
- **Tamil Translation for Accessibility:** By offering the Quran in Tamil, IFT makes the divine message accessible to millions of Tamil-speaking Muslims who may not read Arabic fluently. This removes the language barrier and enables deeper understanding and connection with the Quran.
- **Complete Surah Listing:** All 114 Surahs are listed with their Tamil names, allowing users to easily navigate to any chapter. The clear, organized listing reduces friction and makes the digital Quran easy to use.
- **Audio Integration:** The page includes audio recitation alongside the translation, enabling users to listen while reading. This multisensory experience aids in memorization, correct pronunciation, and deeper comprehension.
- **Mobile-Friendly Access:** The digital format ensures users can access the Quran on their phones, tablets, or computers – removing the physical barrier of carrying a heavy book.

Membership – Recurring Revenue & Customer Loyalty

Screenshot Placeholder:

About This Page:

The Membership page converts one-time shoppers into loyal, repeat customers through tiered subscription plans with quantified benefits.

How It Works:

- Three Plans – Silver (₹250), Gold (₹500), Platinum (₹1000) – cater to different budgets.
- "Most Popular" Badge – Guides customers to the best-value option, reducing decision friction.
- Quantified Benefits – Clear discounts (10%, 15%, 20%), free EPUBs (worth ₹100–₹200), and free shipping – helping customers calculate ROI instantly.
- Simple Subscription – Each plan has a "Subscribe Now" button for frictionless sign-up.

Why It Matters:

- Creates predictable recurring revenue.
- Increases customer lifetime value through exclusive perks.
- Encourages higher order value with discounts and free shipping.
- Builds community loyalty by making customers feel valued.

About Us – Brand Story & Institutional Trust

Screenshot Placeholder:

About This Page:

The About Us page establishes IFT Chennai's credibility by telling the institution's story – established in 1979, it has served the public for over 45 years. This page is where visitors verify legitimacy before making a purchase.

What This Page Does:

- Establishes Legacy: Opens with the 1979 founding year, building instant credibility through decades of service.
- Bilingual Accessibility: Presents content in both English and Tamil, removing language barriers and building emotional connection with Tamil-speaking users.
- Demonstrates Scale: Highlights 600+ publications, signaling IFT as a major publisher with significant reach and influence.
- Positions Authority: Emphasizes pioneering work in popularizing Arabic Language Courses and authentic Tamil Quran translations.
- Builds Social Proof: Mentions wide acclaim and trust from all sections of society, reassuring new customers.
- Creates Emotional Connection: Shares the community mission – presenting Islam in its pristine form to humanity.

Why This Page Matters:

This page converts skeptical visitors into confident customers by showcasing IFT's legacy, scale, authority, and community impact – all factors that build trust and drive purchases.

Project Summary & Architecture

IFT Chennai is a full-stack e-commerce platform for Islamic Foundation Trust (IFT), digitizing 600+ publications across Tamil, English, and Arabic.

Tech Stack: React.js | Node.js | Express.js | MongoDB | JWT | AWS(S3)

Key Features:

- Responsive UI with interactive animations.
- JWT-based authentication with protected routes.
- Cart and order management with real-time updates.
- RESTful APIs for products, users, and orders.
- Membership plans (Silver, Gold, Platinum) for recurring revenue.
- Digital products – audio books, e-Quran, Spotify/Amazon Music integration.
- AWS S3 – Scalable cloud storage for static assets, book covers, audio files, and digital products.

Business Impact:

- Enables 24/7 online shopping, expanding beyond physical store.
- Membership plans drive recurring revenue and customer retention.
- Free digital content builds trust and drives organic traffic.
- Multiple formats (physical, e-book, audiobook, audio Quran) cater to diverse preferences.
